Exerp E-Signature

What is E-Signature?

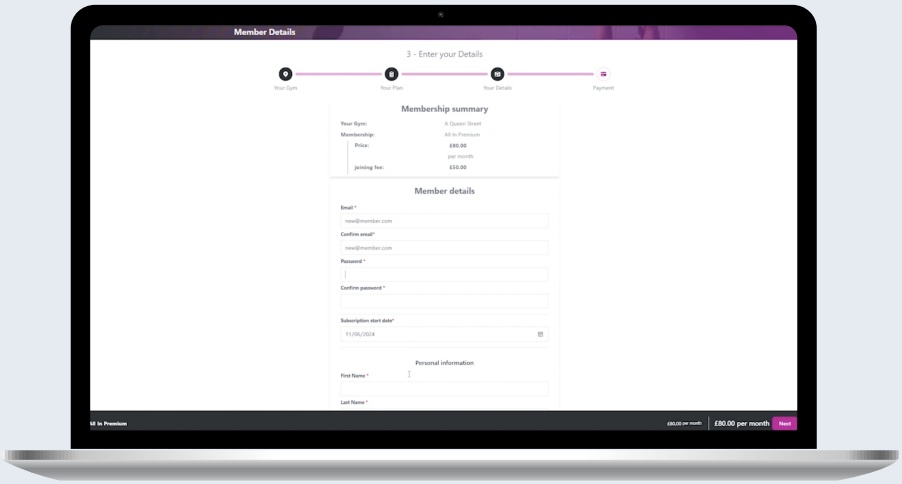
E-Signature is an easy way for new and current members to sign contracts – whether it's a new joining document or an update to their membership. It's all done online, via email and is super simple for not only your team to manage within Exerp, but your customer to action.

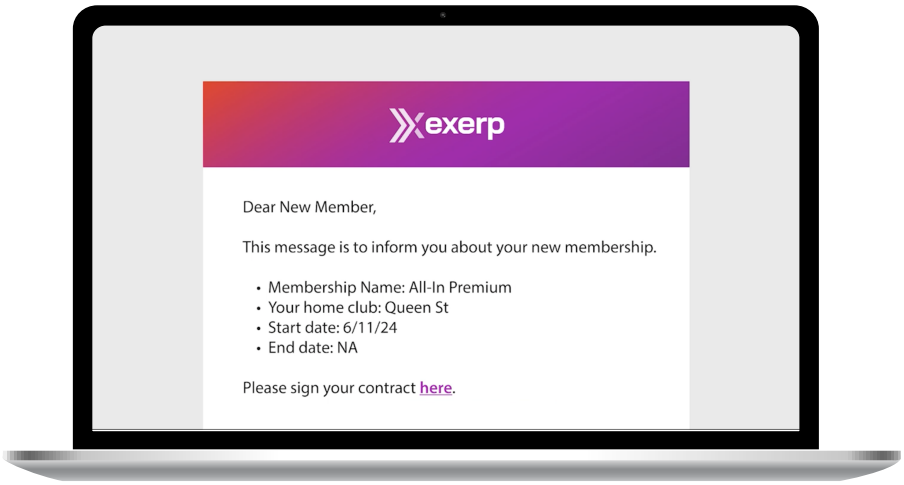
What are the benefits?

- Quick and simple signing of contracts
- Block centre access until the contract is signed
- No more hardware
- Member signs online

How does it work?

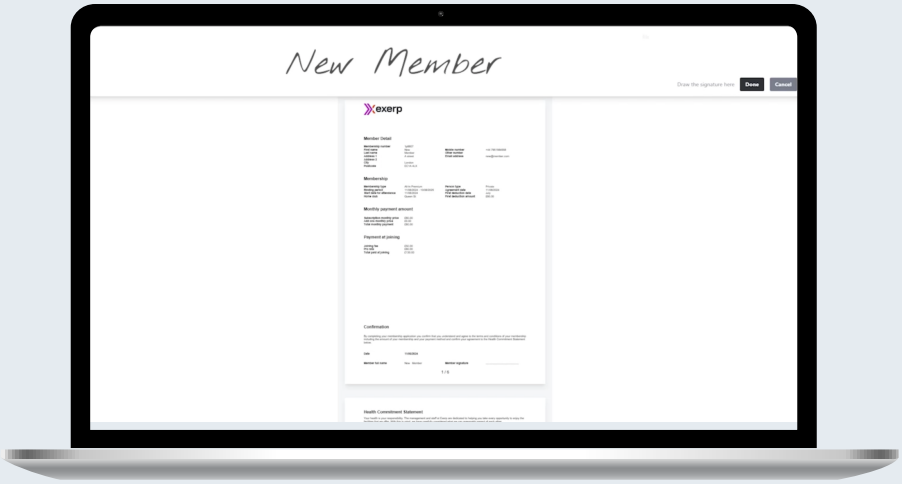
1 Your member makes a purchase which requires a contract signature.





2 Your member gets a link via email, SMS, or WhatsApp to sign the contract.

3 The signed contract then appears within the member's account – both your team and customer can access this.



It really is that simple.

Embrace the future of fitness management with the reliability of Exerp.
